In both the Little Marmon 8 and the Series 75 Marmon Chrome-Vanadium Steel is employed in many vital parts.

For Highly-Stressed Vital Parts Marmon Chose Chrome-Vanadium Steel

FOR years, one ideal has guided Marmon Engineers—to produce the finest performance in the most enduring design known to the engineering profession.

Like other automotive engineers designing fine motor cars, Marmon Engineers have paid particular attention to the steels employed in highly-stressed vital parts.

With such a background, it was only logical that Marmon

Engineers chose Chrome-Vanadium Steel for all the leaves of Marmon front springs, for the master leaves of rear springs, for piston rods and valve tappet rollers.

Ability to resist wear, impact, high stresses and shocks are properties which Marmon Engineers found in Chrome-Vanadium Steel. What qualities are you seeking in steel? Our Metallurgists will welcome an opportunity to help you.

Where "Agathon" Steels Are Tested

The Central Alloy Steel Company are proud of their laboratory, featuring it in their own advertising. We are proud of it, too, because they have in it six Hoskins Electric Furnaces, each equipped with a Hoskins Automatic Temperature Regulator.

In these six furnaces, operating twenty-four hours a day, they test all their different types of alloy steel. They say that their Chromel heating units require infrequent renewal. Mr. Johnson, of their Metallurgical Department, also says he likes their Chromel thermo-couples because "they have a long life and maintain their accuracy throughout this period." He

concludes: "The furnaces have functioned very satisfactorily."

In the laboratory or the factory, where the heat-treatment must be accurate, you'll find some Hoskins Electric Furnace that exactly meets your needs. They can be used for diversified purposes, as in this laboratory, or for continuous production jobs, as in the automobile plants. Typical production jobs are for piston pins, shackle bolts, fan shafts and gears. If you have a production job that must have particular heat-treatments, it would pay you to have Catalog 51S.
